

**AURIANE DELACROIX IN BERLIN**

**Home university, department of trainee:** AgroParisTech – Environment

**Studies of trainee (Bachelor/Master):** Agro Engineer

**Internship period:** June – July 2022

**Topic of the internship:** Urban Ecology – Vegetal Rooftops

**Supervisor of the SURE:** Prof. Dr. Salman Qureshi

**Local supervisor during the internship:** Prof. Dr. Salman Qureshi

**Institution of the internship:** Institute of Geography, Humboldt University of Berlin

**Contents of the internship:** For my second-year internship in AgroParisTech I needed to be an assistant engineer for 2 or 3 months. With the help of SURE I was in contact with the Dr Salman Qureshi from the institute of Geography in Humboldt University. He works in landscape ecology and gives me the mission to redact the beginning of an article on the green balconies. The aim of the study is to identify the ecosystems services brings by different types of balconies asking the populations with questionnaires. In the same way we try to determine links between socio-demographics characteristics of the population and their preferences. This study will be done comparatively between Paris and Berlin. I took advantage of this internship to learn more about eco-urbanism especially in the city of Berlin where I discovered lot of places with different initiatives like the ecovillage UfaFabrik.
